

SPILFYTER®

For Preventive Maintenance

GENIESORB™

Revolutionary, 100% biodegradable GENIESORB Floor Sweep is the economical answer to messy hydrocarbon spills in the industrial environment. Spread under and around machinery, GENIESORB soaks up many times its weight in hydrocarbons and retains them to help prevent leaks onto floors. Unlike other absorbents, GENIESORB will actually lift oil out of soaked concrete. When saturated, simply collect the material, leaving behind a clean, oil-free surface. The collected material has excellent fuel blending capability and incinerates with little ash.

No. 350010. 10 lb. bag
No. 350040. 40 lb. bag

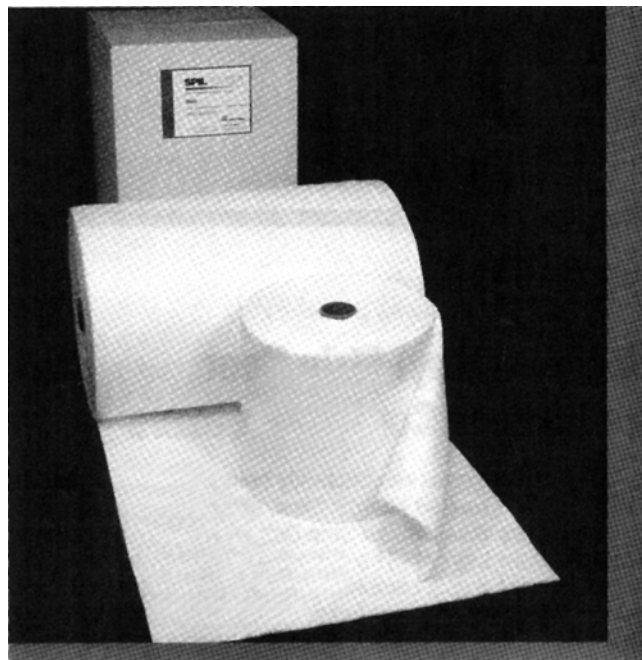

ROLLS

For the containment and absorption of non-aggressive liquids. Common machinery leaks and oil spills cause floors to become unappealing and dangerous. SpilFyter Preventive Maintenance Products are designed for quick and economical cleanup of all non-aggressive liquid leaks and spills. Constructed primarily of cellulose fibers, this maintenance absorbent has a high BTU value and incinerates with little ash. It is also biodegradable.

Use SpilFyter Rolls on all sizes of oily spills and non-aggressive liquid discharges. Rolls can be cut to cover small areas such as under leaking machinery.

No. 151048. 1 - 18" x 100' Roll
No. 151040. 1 - 36" x 150' Roll

DIKES (SOCKS)

SpilFyter Dikes - Socks are ideal for soaking up non-aggressive fluids, oils and other petroleum products. Their moldable shape easily conforms to fit around equipment, drums, tanks, sinks or walkways.

No. 150304. 40 - 3" x 4' dikes
No. 150308. 20 - 3" x 8' dikes
No. 150312. 14 - 3" x 12' dikes
No. 150320. 8 - 3" x 20' dikes
