

MAINTENANCE ACCESSORIES

KWIKCUT

The **rotating/rocking technique** produces fast, easy cuts, together with being **small and lightweight**, saves hours of time and effort.

Ideally suited to a limited working space, the cutter adapts easily where a conventional hacksaw cannot be used.

Kwikcut **produces no sawdust** or cutting residue, **eliminating deburring** and the possibility of contaminating the pipe. This clean, smooth cut allows quick and easy connections for a neat, professional installation.

A Plastic Pipe & Hose Cutter Designed to Meet the Needs of the Professional

Kwikcut Features Include:

- ***Replaceable high-carbon, Teflon-coated steel blade***
- ***Blade closes into its own handle for safe carrying and handling***
- ***Tough, durable nylon handles***
- ***Up to 8 times faster than sawing and deburring***
- ***Tool Pouch available***
